PROFILE

Since my early years, I've felt a strong pull towards creative problem-solving and a continuous pursuit of efficiency. This same spirit resonated with me in coding, where multiple approaches to a challenge pave the way for crafting user-focused products. The precision and analytical mindset I've developed through two decades of devotion to ice hockey drives me to ceaselessly perfect and elevate products to their highest standards.

SKILLS

HTML, CSS, , Javascript, WebApi
React.js, Node.js, Microsoft Office,
CRM(Bullhorn), MySQL, DevOps

EDUCATION

BrainStation | Diploma, Web Development

SEP 2023 - DEC 2023, Vancouver, BC

Trinity Western University | Bachelors in International Studies

SEP 2012 -MAY 2017, Langley, BC

EXPERIENCE

Technical Recruiter | Randstad Canada

MAY 2022 - JULY 2023, Vancouver, BC

- Consistently attained 90% - 110% of monthly KPIs, resulting in enhanced company performance.
- Collaborated with an average of 5 clients and juggled over 10 projects concurrently, leading to first placements for several new clients.
- Cultivated and sustained strong relationships with candidates, facilitating greater client satisfaction.
- Delivered continuous advice, coaching, and insights to candidates aligned with IT market trends, ensuring their readiness and market adaptability.
- Closed deals for professionals by remaining informed about new technologies and market shifts, securing optimal placements in a competitive market.

Healthcare Recruiter | Slate Consulting

JAN 2018 - APR 2022, Vancouver, BC / Tokyo, Japan

- Surpassed annual targets by achieving 200% with pharmaceutical giants and clinical research organizations like Pfizer, AbbVie, and Syneos.
- Managed and executed 20 projects simultaneously for 8 distinct clients, ensuring timely and efficient delivery for all.
- Diminished the resignation ratio by 10% for clients by providing insights into the primary reasons workers departed from their positions, enhancing client retention strategies.
- Identified and onboarded new clients by guiding on potential candidate sources through detailed market analysis, expanding the company's clientele within a year.
- Steered the Vancouver office towards an environment that motivated junior recruiters and researchers, resulting in a 10% revenue performance boost.

PROJECTS

FullStack Developer | WillGro-Online Shopping Website

Dec 2023, BrainSation

- I developed a sophisticated online shopping platform that boasts advanced functionality. This website is meticulously designed to securely store user data, ensuring privacy and data integrity. It integrates a seamless payment solution, offering various payment options to enhance customer convenience. Additionally, the platform features a dynamic order tracking system, built using MySQL. This system efficiently records and manages customer order histories, enabling users to easily track their past and current purchases, while ensuring a user-friendly experience.

Front-End Developer |

Nov 2023, BrainSation/HACKATHON with Shopify

- During a 24-hour hackathon, I rapidly developed and integrated front-end visual functions with back-end data retrieval, utilizing JavaScript and React.js. My contribution focused on crafting user-friendly interfaces and collaborating effectively in a team, leading to a well-received prototype noted for its innovative design and smooth functionality under tight deadlines.
